VAISALA

Core technologies for complete air quality awareness

Air quality monitoring

Turnkey, cloud-enabled stations provide insight from anywhere.

Vaisala Beam Weather Station

Boundary layer measurements

Insights on pollutant movement, mixing, and severity.

Vaisala CL31, CL51, and CL61 (with depolarization) Ceilometers

Wind monitoring and forecasting

Continuous, high-quality wind observations

WindCube vertical profiler, WindCube Scan

The right access to the right information—anywhere.
